**Stocking Recommendations:**

**Bass** – 100 fingerlings per surface acre (4-6" are slightly larger than a fingerling, so stocking can be cut by half. Max pond temp. during summer is 75-85°F. Pond depth should be 6-8 feet.

**Minnows** – 10-20lbs (2,000-4,000 minnows) per surface acre.

**Channel Catfish** – 100 per surface acre. Channel Catfish will reach approximately 2ft in length at maturity. They are semi-aggressive so be mindful if you plan to have them in swimming ponds and they will live approximately 8 years. We do not suggest this species for ponds less than a half-acre in size.

**Trout** – A max of 100 adults per surface acre. Max pond temperature during summer is 65-70°F. Pond depth should be 8-10ft. Should not be stocked with Bass. They do not typically reproduce in ponds, so they will need to be re-stocked every few years.

**Fish Pick-Up:** Thursday, May 21<sup>st</sup> at 11:30am. Orders will be available for pick up at the front entryway.

**Schoharie County SWCD**  
**173 South Grand Street, Cobleskill, NY**

You will receive a phone call within one week prior to pick up as a reminder.  
\*\*Most orders will be pre-packaged in oxygenated bags & boxed for travel.  
**IF YOU ARE ORDERING TROUT**, please bring **1-2 LARGE** totes or boxes. They are coming in oxygenated bags, but without boxes.

\*Refunds will **not** be given for failure to pick up your order on the designated day/time. If you cannot pick up your order, you must make arrangements for it to be picked up. We have no way to hold your fish.

\*The District is not responsible for any mortality of stock which may occur during transport from our location.
